A robbery is the theft of money or property from a person by force or the threat of force. Robbery rates for the census tracts of Omaha vary from a low of 0 to a high of 10.98 per 1000 in population. Robbery rates for 2000 are highest east of 50th Street and north of Pacific. High rates can also be found west of 72nd Street, especially in the area between Dodge and Pacific, between 72nd and 84th Streets. In some cases, the rates are high because a particular census tract has a low population.
